## ENCROACHMENT PERMIT CHECKLIST

Applicants for all development application reviews must complete this checklist and submit it with the Development Application. Refer to Development Code Section 16-73(d) for additional information. Contact the Planning Division with questions regarding these requirements: [planning@lacnm.us](mailto:planning@lacnm.us).

### APPLICABILITY

An Encroachment Permit is required for the construction of structures or site elements which would encroach upon a public utility, drainage easement, or public right-of-way owned by the County.  
 See 16-73-(d)(2) Exemptions for non-permanent structures and private easements.  
 The permit issuance does not limit the County's rights to the easement or right-of-way and may require the use of the easement or right-of-way at any time.

### TYPE OF ENCROACHMENT REQUESTED

- Encroachment upon public utility easement
- Encroachment upon drainage easement
- Encroachment to a county-owned public right-of-way

### SURVEY

Indicating the following:

- Dimensions of property boundaries
- Existing easements and public right-of-way
- Existing utility and stormwater drainage features
- Existing structure(s)
- Distances to any of the above from the proposed structure
- Width and length of the proposed area of encroachment

### SITE PLAN

Site Plat at a minimum scale of 1" = 100' that illustrates the following:

- Proposed new structures and modifications to the property.
- Width and length of the proposed area of encroachment.
- Existing easements, public right-of-way, stormwater drainage, or any public infrastructure serving the property or surrounding area including, but not limited to pedestrian/vehicular circulation and street features (*sidewalks, driveways, traffic signs and devices, lighting, landscaping and furnishings, grading and stormwater drainage features, and utility services*)
- Documentation of compliance with all applicable development standards (*setbacks, building heights, open space, parking, applicable development phasing*).

See Reverse.

## CONSTRUCTION DRAWINGS

Elevation drawing(s) at a minimum scale of 1/8" = 1' that indicate:

- Proposed new structure(s)
- Modifications to the easements, public right-of-way, or public infrastructure serving the property or surrounding area including streets, stormwater drainage features, and utilities including any required by the County Engineer and Utilities Manager.

## ADDITIONAL SUBMITTALS

If an application for encroachment is related to a larger site plan or development plan application, any applicable impact studies as required by the County Engineer or Utilities Manager and further review may apply.

## DECISION CRITERIA 16-73 - (d)(4)

An application for an Encroachment Permit shall be approved if it complies with all applicable standards in this Code, any other adopted County regulations, and any requirements deemed necessary by the Utilities Manager and County Engineer. Requests that may result in damage or interfere with the operation, maintenance, and/or repair of any public street, stormwater drainage facility or utility will be denied.

- Staff finds that this criterion has been met
- Staff finds that this criterion has not been met – more information is needed

## UPON APPROVAL

If the application is approved by the County Engineer and Utilities Manager, the Community Development Department shall issue an Encroachment Permit. The property owner has five (5) days from permit issuance to record the Encroachment Permit with the office of the county Clerk and submit the recorded copy to the Community Development Department before the Encroachment Permit takes effect/is actionable.
